

# Tree Planting

## *Stream Stabilization*

### Dorman Streambank Stabilization

#### Project Profile

**Landowner:** Ronald Dorman

**Location:** Cloud County

**Focus Area:** Republican River

**Habitat Restoration:** 1614 Linear Feet

**Project Year:** 2006

**Project Cost:** \$3,915.30

This project was submitted to the KAWS Solomon Valley Chapter and is located along the Republican River in Cloud County. This project allowed for the planting of bare-root trees and willows along the South bank of the Republican River above where weirs were constructed. There were approximately 1302 bareroot trees and 837 Willow cuttings planted along a 1614 linear foot stretch of stream bank. This project was in addition to an earlier project that provided for 8 rock weirs in this area. The trees planted will help prevent additional erosion from the newly shaped stream bank.
