

# Stream & River *Restoration*

## Hendrickson and Blaser Project

### Project Profile

**Landowner:** Private

**Location:** Washington County

**Focus Area:** Stream

**Habitat Restoration:** Fencing and alternate water supply

**Project Year:** 2003

**Project Cost:** \$8,600

This project was submitted to the Three Rivers Chapter and is our first project to help address fecal coliform problems within the watershed. The stream is fenced and an alternate water supply provided with a well and solar pumping unit. This will be a demo project in the area in order to encourage other landowners to follow suit. The total project cost is estimated at \$8,600 with \$4,000 approved for funding assistance by the PMT. Partners on the project include the landowners, the Washington County Conservation District and KSU Extension.
