

Wetland *Restoration*

KCPL Priarie Wetland Project

Project Profile

Landowner: KCPL
Location: Johnson County
Focus Area: Wetland
Habitat Restoration: 10-acre buffer
Project Year: 2003
Project Cost: \$3,600

Photo not available at press time.

This 10-acre buffer project was submitted to the Eastern I-70 chapter. A large wetland already exists through a partnering effort with the Kansas City Power and Light company. In order to protect the wetland, a 10-acre buffer is needed. Portions of the area will be reshaped, a tile outlet will be placed and the area reseeded to native vegetation. The project cost is estimated at \$3,600 with \$2,500 approved by the PMT. Partners include the KCPL, NRCS and the Johnson County Conservation District.
