

Stream & River *Restoration*

Republican Stabilization Project

Project Profile

Landowner(s): Longford Mill Products &
Agnes Anderson Heirs, Inc.

Location: Clay County

Focus Area: Republican River/
Milford Reservoir

Habitat Restoration: Stream & Riparian Zone

Project Year: 2004

Project Cost: \$29,803

This project was submitted to the KAWS Three Rivers Chapter and stabilized 3,900 feet of the Republican river above Milford Reservoir. The project involves re-sloping of the bank, placement of weirs in the stream to stabilize the toe of the bank and re-establishment of native vegetation in a 100 foot buffer. It is in the SW 1/4 of 4-7-2, SE1/4 of 5-7-2 and NE 1/4 of 8-7-2. The total project cost was \$29,803 and KWO/KAWS provided \$20,000 in order to complete the project. Along with stabilizing 3,900 feet of stream-bank, the project also re-established 9 acres of riparian buffer. This project ultimately affected 72 acres in Clay County for improved water quality.
