

Wetland *Restoration*

South Lakes Wetland Project

Project Profile

Landowner: City of Lenexa

Location: Johnson County

Focus Area: South Lakes Technology Park

Habitat Restoration: Wetland regrading and revegetating

Project Year: 2003

Project Cost: \$50,000

This is an urban project submitted to the Eastern I-70 Chapter by a local engineering firm. The project involved regrading and planting native grass and wetland species in the upper end of two lakes in the South Lakes Technology Park in Lenexa. The project supplies a wetland filtration area on the upper end of both lakes. This is a high profile project and will be used as a demo for retrofitting existing business parks with more environmentally responsible land and vegetation management programs. Estimated total cost of the project is \$50,000 with \$15,000 approved by the PMT.
